Disclosures

- 1) The interest rate is a variable rate and we may change the interest rate on your account at any time.
- 2) The Average Daily Balance method applies a periodic rate to the average daily balance in the account for the period. The average daily balance is calculated by adding the principal in the account for each day of the period and dividing that figure by the number of days in the period.
- 3) Interest calculation is either simple or compound. Simple interest is interest paid only on the original balance. Compound interest is interest paid on the original balance plus the accrued interest.
- 4) The Daily Balance is determined by the application of a daily periodic rate to the principal in the account each day.
- 5) Fees from your mobile or data carrier may apply.
